Wireless Sensor Networks (CSD337) Lab 2

Instructions

For this lab, you will simulate wired networks.

Submission

- No submission required.

Grading Criteria

- This assignment carries 0 points; however, you should complete it during the lab hours.

Questions:

1. Simulate the wired network scenario explained during the lab hours. Set up the TCP and UDP connections; FTP and CBR (or any other application) that will run over it. Analyse the packet drop for all TCP/UDP connections in the backbone link and draw a graph for the same using Xgraph.
